

Assignment 2 – Requirements Due: Week 7 Class 2 Hours 2-3

You are to complete your business' ASP.Net MVC site. Functionality for this application will include minimally the following: (zip up only those pages with a (Z) and only zip the .cs or .cshtml files) Also please include **all jquery code** from your site that you have coded in the 2nd half.

5 Controllers and their respective Views:

1. Home (updated) (Z)
2. Shop – min 12 items
3. ViewCart (updated)
4. Orders
5. OrdersRest (Z) – no view required
6. Branches
7. BranchesRest

6 ViewModel Objects

1. CustomerViewModel
2. ProductViewModel
3. OrderViewModel (updated) I(Z)
4. CartItem
5. BranchViewModel
6. eStoreViewModelConfig

5 Model Objects

1. CustomerModel
2. ProductModel
3. OrderModel (updated) (Z)
4. BranchModel
5. eStoreModelConfig

The site is expected to run from IIS **not Visual Studio**, ensure that your screen shots include the url line of the browser

4 Screen shots of your site executing (don't do these until the actual demonstration)

1. Email of 2nd order generated
2. Order List prior to selecting order
3. JQuery Rendered Order (the order has to be the 2nd one from demo)
4. Branch Locator with designated location with bubble popup

Please ensure that your code is commented (including revision history where necessary) and your pages are easy to read, have decimal data lined up (right aligned), passwords masked and most important are functional.
