Assignment 1 – Requirements Due: Week 5 Class 1 Hour 2

You are to complete your business' ASP.Net MVC application (remember sell something in good taste). Functionality for this application will include minimally the following: (zip up only those pages with a (Z) and only zip **the .cs or .cshtml files**)

3 Controllers and their respective Views:

1. Home (Z)
2. Shop – min 10 items (Z)
3. ViewCart (Z)

5 ViewModel Objects

1. CustomerViewModel(Z)
2. ProductViewModel
3. OrderViewModel(Z)
4. CartItem
5. eStoreViewModelConfig

4 Model Objects

1. CustomerModel (Z)
2. ProductModel
3. OrderModel (Z)
4. eStoreModelConfig

7 Screen shots of your site executing (don't do these until the actual demonstration)

1. 1 Screen shot of the final tab of the Register page submitted with all fields empty
2. 1 Screen shot of the final tab of the Register screen after registration complete
3. 1 Screen shot of the Main Menu before login
4. 1 Screen shot of the Main Menu after login
5. 1 Screen shot of your catalogue page
6. 1 Screen shot of the catalogue popup
7. 1 Screen shot of your view cart after ordering

Please ensure that your code is commented and your pages are easy to read, have decimal data lined up (right aligned), passwords masked and most important are functional

Also please ensure that all pages incorporate a master style (_layout.cshtml)

Note: While there are marks for overall look and feel, it is more important to get the store functional first. Cosmetic appeal marks will only be considered if the store is fully functional. Extra functionality or unique approaches will also be taken into consideration. All pages should have a <u>unique</u> and consistent look and feel (colours, navigation methods...)

15 % of Final Mark
